

The needs of the client:

- A very simple website with the clients work on it
- A simple navigation bar
- An “about me” page
- Make sure there are links to the clients social media platforms
- Have a contact page to allow people to get in touch with my client

The needs of the website:

- Website needs to be responsive
- Needs to be built Mobile first
- Will need to use the grid system to organise the clients work on the website
- Will need to make sure that there is a contact page with different boxes

User scenarios

1. User wants to connect with client about their work:

Make sure that there are links to social Media platforms.

2. User would like to send a message to the client:

User can put their details down on contact page for client to get back to.

3. User would like to know about the client:

The user can go on the about page to find out about the client.

4. The user would like to be able to access the website on their mobile:

Make sure that the website is mobile friendly by making the website mobile first.

5. The user would like to know about all the different exhibitions the client has done

Make sure there is an exhibition page outlining all the different exhibitions.
