Interaction Design (IXD)

- As the clients work mainly consists of work which has variants of black and white, most colours will be different variants of black and white.
- The navigation bar will be a horizontal bar which breaks into a vertical one on the smaller screens.
- The footer will contain social media icons which when clicked on will open up the clients social media page on a new tab.
- When something is hovered around on, it will change colour.
- When an image in the works page is hovered on, a nice thick black border will come up.
